Fin-Tac™ is a patented, multipurpose utility station for your boat with an adjustable mount.

It measures 42"w x 24"d x 9"h and provides over 9 sq.ft. of work and storage space.

US Patent #6,101,966

Installs on Transoms, Aft Bulkheads, Splash Boards or any Flat Surface on most boats!

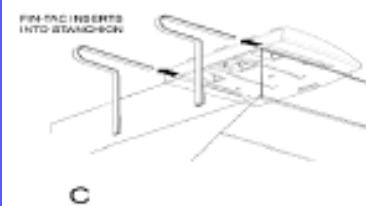

click on any picture for an enlarged view

View A: One pair of Mount Plates are permanently installed into the transom - aft bulkhead or any flat surface on your boat. Once the mounting plates are fastened in place simply slide the two Support Stanchions into each mount plate.

View B: Your choice of Mount plate location will determine the height Fin-Tac is located over the transom and whether you want the Support Stanchions close together or wider apart. (see the two sets of tracks located at the bottom of Fin-Tac)

View C: After the Mount Plates and Support Stanchions are in place hold the Fin-Tac by its handle lift and slide the unit onto the extended Horizontal Stanchion Arms. A pair of C channel mount brackets located in the tracks on the bottom of the Fin-Tac will receive and hold the unit.

View D: Fin-Tac is designed to fit level and parallel to the deck of your boat. Draft angles on some transoms or bulkheads may require use of shims (provided) to insure desired positioning. [Click on the image to the left for more details.](#)

Note: The Mounting Plate and Support Stanchion are designed to provide support for designated use only. Do not sit or stand on Fin-Tac. Fin-Tac is not responsible for accident or loss due to misuse of our product.
